

COMPANY OVERVIEW

TechInfoSec LLC is a Service-Disabled Veteran-Owned Small Business (SDVOSB) delivering secure, AI-driven solutions that strengthen mission resilience for government and commercial clients. Headquartered in Tampa Florida, TechInfoSec provides full-spectrum cybersecurity, data, and cloud engineering services built around federal compliance frameworks such as **NIST 800-171, CMMC, and FedRAMP**.

Combining battle-tested discipline with deep engineering and analytics expertise, we design, deploy, and defend digital ecosystems for agencies and enterprises that demand precision, automation, and measurable results. Your mission is our mission — and we secure it.

AI Solutions

CyberSecurity

DataExperts

TECHNICAL CAPABILITIES

AI & Data Analytics

- Generative AI & Document Intelligence (RAG, LLM App Design, OCR)
- Advanced Analytics & Data Engineering (ETL, Pipelines, Integration)
- API & Workflow Automation (Python, Power Automate, ServiceNow Integrations)

Automation & Integration

- Low-Code / No-Code Solutions / Custom Automations
- Intelligent Document Processing (OCR + AI)

Cybersecurity

- Strategy, GRC & Risk Management (vCISO, NIST CSF, ISO 27001, SOC 2, PCI DSS, HIPAA)
- Security Operations, Incident Response, Vulnerability Management & Offensive Security

Cloud & Platform Engineering

- Cloud Architecture & Migration (Azure, AWS, Hybrid & Multi-Region Design)
- Platform Engineering, Performance Optimization & Cost Governance

Governance & Compliance

- ITIL/ITSM Framework
- Audit Readiness, Internal Audit Support (CMMC, HIPAA, PCI, FedRAMP)
- Risk Assessments, Continuous Monitoring & Evidence Management

QUALITY COMMITMENT

Quality and security are built into every engagement from design through handoff. Our solutions are engineered in alignment with NIST 800-171, CMMC, and FedRAMP so they are ready for scrutiny in regulated, audit-heavy environments. We rely on repeatable methods, clear documentation, and testable controls to prove how things work—not just say they do. AI-enhanced automation reduces manual effort and error, while our disciplined review and evidence-pack approach keeps outcomes reliable, compliant, and mission-ready long after delivery.

Differentiator & Experience

With 15+ years TechInfoSec's LLC founder has delivered cybersecurity, AI, and data analytics solutions for one of the world's largest global consulting firms, supporting highly regulated, audited environments. That work has spanned securing cloud and on-prem systems, automating reporting and monitoring, and turning messy data into reliable, decision-ready insight. As a Service-Disabled Veteran-Owned firm, we care deeply about helping the U.S. government succeed and stay ahead in AI and cyber; our team does the work hands-on, building world-class, secure, automated solutions so U.S. agencies have the best tools and defenses in the world.
